eltherm – Your reliable and competent partner with several years of experience in the field of electrical heat tracing. You wish to transfer heat to the media or compensate heat loss? eltherm provides the solution.

Our well-founded and expert knowledge, which is based on state-of-the-art technology, is always available to you. Quality is both produced and lived at eltherm. Moreover, we have achieved DIN ISO 9001:2008 and ISO 14001 certification.

The latest IT, planning and testing systems ensure quality and timely manufacturing processes.

In close collaboration with the customers, eltherm develops individually tailored solutions, supporting them when planning, proposing and assembling electrical heating systems. A perfected, high-quality product program enables eltherm to find the most reasonable economical solution for you.

Our results are convincing.

Further documents are available with information about our high-quality products:

Self-regulating Heating Cables

Heated Hoses

Heating Mats Heating Jackets

Special Heating Systems

Measurement and Control

Important information

Products marked with the -symbol can be used in hazardous areas. The temperatures allocated to the products are the maximum permissible exposure temperatures. Our project engineers will be glad to assist you to design and dimension electrical heat tracing systems. Moreover, we have prepared a questionnaire which helps you to record operating data and enable correct dimensioning and allocation. We would be happy to send you the questionnaires for the respective product, to elaborate a customized solution for your application and to submit you our offer. All products listed in the catalogue are available ex stock (subject to prior sale). All products offered in this catalogue can also be manufactured by eltherm using different dimensions, outputs and voltages.

Furthermore, please note:

-  All products listed in this catalogue shall only be connected and commissioned by a qualified electrician.
-  All applicable local electrical and safety regulations must be observed during installation and operation.
-  Normally, electrical heating systems require a temperature control unit as it is only possible to ensure that the exposure temperatures for the electrical heating and products to be heated are not exceed if such a unit is used.
-  As a general rule, the following specifications of the standards EN 60519-1-2-10 and EN 62395-1 shall be respected for the operation of electrical heating.

-  We recommend to use a temperature control system in conjunction with a stabilized system design or a temperature limiter to avoid damages to persons and material.
-  In accordance with EN 62395-1 and EN 60519-10, residual current devices (RCDs) are to be provided in order to disconnect from the mains in good time and to avoid consequential damages.
-  Attention: heating cable and heating tape may neither intersect nor come into contact. There is the danger of burnout due reciprocal heating up (except: type ELSR).
-  Our general assembly and operating instructions for this product are valid for the use of the heating cables.

Specifications and advertising messages in this products and services catalogue, irrespective of their nature, in particular descriptions, illustrations, drawings, samples, information pertaining to quality, condition, composition, performance, consumption and usability as well as dimensions and weights of the product range remain subject to change in as far as they are not expressly declared as binding. They do not denote any assurance or guarantee whatsoever. Minor deviations from the product specifications shall be deemed approved in as far as they are not unreasonable for the buyer.

We explicitly reserve the right to amend errors and alter technical data.

 Coil ware

 ESTI: Approval for the Swiss market

 NEMKO: Approval for the Norwegian market

 Suitable for contact with foodstuffs/approved for use in potable water

 EAC: Approval for the Russian market

 NEPSI: Hazardous Area Products for Chinese Market

 Certified according to VDE standards

 CSTB: Approval for the French market

 ktl: KTL: Korean Testing Laboratory for Hazardous Area Products

 Ship Classification Maritime Service

 IEC/IECEX: Certified according to IECEx-scheme

 EXPOLABS: Approval for the South-African Market (Ex, IA approval)

 INMETRO: Approval for the Brazilian market

 Hyg, DVGW, KTW: Certification Body, Approval for Usage in Drinking Water

 ABS: American Bureau of Shipping - Product Design Assessment Certificate

Constant Wattage Heating Cable with Resistance Wire

The installation of this heating cable is highly cost-efficient with any kind of heat tracing application thanks to the single end power input. The heating cable consists of a succession of heating zones (length = contact spacing) and can be cut to length in sections of the contact distance to the required length. When cutting into lengths, the heating circuit is interrupted up to the next contact point and this non-active part can be used as a cold lead. During the design phase, one contact spacing length per planned heating circuit must be calculated additionally.

Advantages:

- Single end connection
- Can be cut off the roll
- Constant power output per meter
- Highly flexible

Applications:

- Vessels, piping, valves
- Food processing industry
- Frost protection and temperature maintenance on pumps, etc.

Type ELP/Si up to 200 °C

Technical Information

Data

■ Insulation	Silicone
■ Outer jacket	Silicone
■ Protective braid	Copper
■ Bending radius, min.	30 mm
■ Bus wire cross section	2 x 1.5 mm ²
■ Moisture proof	Yes
■ Nominal voltage	230 V AC/DC

Cables shall neither intersect nor contact. Provide protection by means of circuit breaker FI 30. Please observe the standards IEC 62395-2, EN 60519-10.

Type ELP/Si up to 200 °C

Type	Nominal output	Dimensions approx. (mm)	Contact spacing (m)	Art. No.
ELP/Si 10 BO 230	10 W/m	5.25 x 9.75	1.0	0320102
ELP/Si 20 BO 230	20 W/m	5.25 x 9.75	1.0	0320108
ELP/Si 30 BO 230	30 W/m	5.25 x 9.75	1.0	0320114
ELP/Si 40 BO 230	40 W/m	5.25 x 9.75	1.0	0320120

Maximum heating circuit length			
Type	W/m	Length (m) at 50 °C	Length (m) at 150 °C
ELP/Si 10 BO 230	10	198	147
ELP/Si 20 BO 230	20	139	102.5
ELP/Si 30 BO 230	30	98	82.5
ELP/Si 40 BO 230	40	73.5	70.5

Constant wattage heating cables up to nominal voltages of 120 V or 400 V are available upon request. Bus wire cross section 2 x 2 mm² upon request.

Constant Wattage Heating Cable with Resistance Wire

These heating cables are particularly suitable for maintaining temperatures of up to +150°C. Its great flexibility down to -70°C means that this version is ideal for heat tracing in industrial refrigeration or in countries with very harsh climates.

The heating cable consists of a succession of heating zones (length = contact spacing) and can be cut to length in sections of the contact distance to the required length. When cutting into lengths, the heating circuit is interrupted up to the next contact point and this non-active part can be used as a cold lead. During the design phase, one contact spacing length per planned heating circuit must be calculated additionally.

Advantages:

- Single end connection
- Can be cut off the roll
- Constant power output per meter
- Highly flexible

Applications:

- Vessels, piping, valves
- Food processing industry
- Frost protection and temperature maintenance on pumps, etc.
- Filter heating systems

Type ELP/Si-F up to 200 °C

Technical Information

Data ELP/Si-F-B

■ Insulations	Silicone
■ Protective braid	Copper/zinc
■ Nominal voltage	230 V AC/DC or 400 V AC/DC
■ Dimensions	6.5 x 10.5 mm
■ Permissible ambient temperature	-70...+200
■ Bus wire cross section	2 mm ²

Data ELP/Si-F-BOT

■ Insulations	Silicone
■ Outer jacket	Fluoropolymer
■ Protective braid	Copper/zinc
■ Nominal voltage	230 V AC/DC or 400 V AC/DC
■ Dimensions	7 x 10.5 mm
■ Permissible ambient temperature	-70...+200
■ Bus wire cross section	2 mm ²

Type ELP/Si-F up to 200 °C

Maximum heating circuit length

Type	Nominal output (W/m)	Contact spacing (m)	length (m)	Maximum holding temperature °C	Nominal voltage (V)	Art. No.
ELP/Si F 20 B	20	0.7	140	150	230	0320210
ELP/Si F 30 B	30	0.7	120	140	230	0320211
ELP/Si F 40 B	40	0.6	100	120	230	0320212
ELP/Si F 40 B	40	1.0	100	120	400	0320312
ELP/Si F 20 BOT	20	0.7	140	150	230	0320220
ELP/Si F 30 BOT	30	0.7	120	140	230	0320221
ELP/Si F 40 BOT	40	0.6	100	120	230	0320222
ELP/Si F 40 BOT	40	1.0	100	120	400	0320322

Cables shall neither intersect nor contact. Provide protection by means of circuit breaker FI 30. Please observe the standards IEC 62395-2, EN 60519-10.

Constant wattage heating cables up to nominal voltages of 120V or 400V are available upon request. Bus wire cross section 2 x 2 mm² upon request.

*given an utilization of 80 % 16 A and 10 % voltage drop.

Constant Wattage Heating Cable with Resistance Wire

These parallel heating cables offer tremendous flexibility in use, as they can easily be cut to the required length off the roll, with the assurance of constant power output. There is no need for a connecting cable and input can be unilateral. It is quick and easy to assemble; this saves a lot of time, and reduces costs considerably as a result. Since output of up to 60 W/m is possible for lengths laid to piping, ELP parallel heating cables are particularly suitable for piping with high output requirements such as in industrial process technology. The particularly temperature-resistant outer shell in PFA and the high level of chemical resistance of the PFA ensure a long useful life.

Advantages:

- Single end power input
- Can be cut off the roll
- Constant power output per meter
- Long life cycle
- Laying without exact measuring possible
- High chemical resistance
- UV resistance

Applications:

- Vessels, piping, valves
- Building construction
- Food processing industry
- Paper industry

Type ELP/PFA up to 260 °C

Technical Information

Data

■ Insulations	PFA
■ Protective braid	Nickel-plated copper
■ Outer jacket	PFA
■ Nominal temperature	260 °C
■ Moisture proof	Yes
■ Bending radius, min.	25 mm
■ Bus wire cross section	2 x 1.5 mm ²
■ Nominal voltage	230 V AC/DC

Standards

■ Manufactured according to	DIN VDE 0721-52 EN 62395-1; 2007-05
■ Certificates	12ATEX1438U IECEX EPS 12.0009U
■ Classification	II 2G Ex e IIC Gb II 2D Ex tb IIIC Db

Cables shall neither intersect nor contact.
Provide protection by means of circuit breaker FI 30.
Please observe the standards IEC 62395-2, EN 60519-10.

Type	Nominal output	Working temp. max	Dimensions approx. (mm)	Contact spacing (m)	Art. No.
ELP/PFA 15 BOT	15 W/m	205°C	8.0 x 5.5	1.0	B0332015
ELP/PFA 30 BOT	30 W/m	190°C	8.0 x 5.5	1.0	B0332030
ELP/PFA 45 BOT	45 W/m	175°C	8.0 x 5.5	1.0	B0332045
ELP/PFA 60 BOT	60 W/m	160°C	8.0 x 5.5	1.0	B0332060

Bus wire cross section 2 x 2 mm² upon request.

Maximum heating circuit length			
Type	W/m	Length (m) at 50 °C	Length (m) at 150 °C
ELP/PFA 15 BOT	15	161	119
ELP/PFA 30 BOT	30	98	82.5
ELP/PFA 45 BOT	45	65.5	65.5
ELP/PFA 60 BOT	60	50	50

Heating circuit lengths ELP-PFA on the following conditions

- 80 % utilisation
- 16 A circuit breaker
- max. 10 % voltage drop

Constant Wattage Heating Cable with Resistance Wire

PTFE-insulated Heating Cable

Use on apparatus, vessels, pipes, valves, etc., in which low bending radii also allow compact tracing on small components across the entire surface.

Advantages:

- Highly flexible
- Small bending radius
- High operation temperature
- High chemical resistance
- Moisture proof

Applications:

- Vessels, pipes, valves
- Small components
- Can be used in many industrial areas
- Rotor blades
- Marble plates

Type ELKM-A up to 260 °C

Technical Information

Data

■ Insulation	PTFE
■ Nominal voltage max.	750 V
■ Output, max.	30 W/m*
■ Operating temp., max.	260 °C
■ Bending radius, min.	2.5 x outer diameter
■ Installation temp., min.	-60 °C
■ Moisture proof	Yes
■ Heat conductor	Stranded, spirally wound for nominal resistance > 8,000 Ω/km

Standards

■ Manufactured according to	DIN VDE 0253
-----------------------------	--------------

Type ELKM-A up to 260 °C

*Note: The output per meter of heating cable and the maximum possible operating temperatures depend on the respective application. For individual cases, we recommend that you contact our engineers – we will be pleased to advise you.

Nominal resistance Ω/km	Outer diameter approx. (mm)	Weight approx. (g/m)	Temperature coefficient (x 10 ⁻³ /K)	Art. No.

Weight tolerances are possible for manufacturing reasons. Nominal resistances up to 1,500,000 Ω/km upon request. Resistance tolerance: +/- 5 %.

For applications with fixed external diameter, please contact our engineers first.

Cables shall neither intersect nor contact. Provide protection by means of circuit breaker FI 30. Please observe the standards IEC 62395-2, EN 60519-10.

PTFE-insulated Heating Cable with Protective Braid Cu/Ni

Use on apparatus, vessels, pipes, valves, etc., in which low bending radii also allow compact tracing on small components across the entire surface. We recommend our heating cable ELKM-AE with protective braid AE for unprotected use in corrosive environment.

This heating cable is also available without braid under the name ELKM-A – just ask us.

Advantages:

- Highly flexible
- Small bending radius
- High operation temperature
- High chemical resistance
- Moisture proof

Applications:

- Vessels, pipes, valves
- Small components
- Can be used in many industrial areas
- Rotor blades
- Marble plates

Type ELKM-AS up to 260 °C

PTFE-insulated Heating Cable with Protective Braid VA

Use on apparatus, vessels, pipes, valves, etc., in which low bending radii also allow compact tracing on small components across the entire surface.

This heating cable is also available without braid under the name ELKM-A – just ask us.

Advantages:

- Highly flexible
- Small bending radius
- High operation temperature
- High chemical resistance
- Moisture proof

Applications:

- Vessels, pipes, valves
- Small components
- Industrial applications
- Heat tracing on molds
- Heat tracing on antenna
- IBC's

Type ELKM-AE up to 260 °C

Technical Information

Data

■ Insulation	PTFE
■ Protective braid	VA 1.4401 / SS 316
■ Nominal voltage max.	750 V
■ Output, max.	30 W/m*
■ Operating temp., max.	260 °C
■ Bending radius, min.	2.5 x outer diameter
■ Installation temp., min.	-60 °C
■ Moisture proof	Yes
■ Heat conductor	Stranded, spirally wound for nominal resistance > 8,000 Ω/km

Standards

■ Manufactured according to	DIN VDE 0253
-----------------------------	--------------

*Note: The output per meter of heating cable and the maximum possible operating temperatures depend on the respective application. For individual cases, we recommend that you contact our engineers – we will be pleased to advise you.

Weight tolerances are possible for manufacturing reasons. Nominal resistances up to 1,500,000 Ω/km upon request. Resistance tolerance: +/- 5 %.

For applications with fixed external diameter, please contact our engineers first.

Cables shall neither intersect nor contact. Provide protection by means of circuit breaker FI 30. Please observe the standards IEC 62395-2, EN 60519-10.

PTFE-insulated Heating Cable with Protective Braid + Outer Jacket

This versatile, factory terminated, heating cable is used for frost protection and temperature maintenance, even under highly corrosive environmental conditions which means this heating cable can be used for an extremely wide variety of applications.

Advantages:

- Factory terminated
- High chemical and mechanical resistance
- Can be used in all industrial areas
- High operation temperature
- Easy to install, even on complex shapes
- Highly flexible
- Resistant to steam purging

Applications: e.g.

- Heat tracing on tanks
- Heat tracing on vessels
- Heat tracing on filters
- Heating satellite dishes
- Heat tracing on hoppers
- Pipe, valve and pump heating
- Automotive
- Tank containers
- IBC's
- Heating hoods

Type ELKM-AG-L up to 260 °C

Cables shall neither intersect nor contact. Provide protection by means of circuit breaker FI 30mA. Please observe the standards EN 60079-30-2, EN 60519-10.

PTFE-insulated Heating Cable Factory Terminated

Use on apparatus, vessels, pipes, valves, etc., in which low bending radii also allow compact tracing on small components across the entire surface.

The version with protective braid, nickel-plated copper, is available with the name ELK-AS. A version without protective braid is also available: ELK-A – just ask us.

Advantages:

- Factory terminated
- Highly flexible
- Small bending radius
- High operating temperature
- High chemical resistance
- Moisture proof

Applications:

- Vessels, pipes, valves
- Small components
- Can be used in many industrial areas
- Heat tracing on molds
- Heat tracing on satellite dishes
- IBC's

Type ELK-AE up to 260 °C

Technical Information

Data

■ Insulation	PTFE
■ Protective braid	VA 1.4401 / SS 316
■ Nominal voltage max.	230 V
■ Output, max.	25 W/m
■ Operating temp., max.	260 °C
■ Heating conductor diameter	3.1 - 3.6 mm
■ Bending radius, min.	2.5 x outer diameter
■ Installation temp., min.	-60 °C
■ Cold lead length, both ends	1.2 m, without plug
■ Moisture proof	Yes
■ Protection class	I

Standards

■ Manufactured according to	DIN VDE 0253
■ Final inspection according to	DIN VDE 0721 T 411 2.5 kV AC - 1 min EN 62395-1

PTFE-insulated Heating Cable Factory Terminated

This versatile heating cable is used for frost protection and temperature maintenance, even under highly corrosive environmental conditions. The heating cable ELK-AG-N is suited and approved for use in potentially explosive atmospheres. It is highly flexible permitting its application in areas of use. Upon consultation of our engineers, this cable may likewise be used for inside trace heating of piping.

Advantages:

- Factory terminated
- High chemical and mechanical resistance
- Can be used in all industrial areas
- High operating temp.
- Can be used in liquids
- Easy to install, even on complex shapes
- Highly flexible
- Resistant to steam purging

Applications, especially in Hazardous Areas: e.g.

- Heat tracing on tanks
- Heat tracing on vessels
- Heat tracing on filters
- Heat tracing on hoppers
- Pipes, valves and pumps
- Tank containers
- IBC's
- Heating hoods
- Automotive
- Varnishing plants

Type ELK-AG-N up to 260 °C

*Note: The output per meter of heating cable and the maximum possible operating temperatures depend on the respective application. For individual cases, we recommend that you contact our engineers – we will be pleased to advise you.

Heating Tape for Sensitive Surfaces

The factory terminated heating tape ELW-GN with E-glass insulation is suitable for trace heating of apparatus, appliances and systems in a non-corrosive environment and its preferred use is for glass devices and systems with sensitive surfaces.

Advantages:

- Factory terminated
- Single end connection
- Highly flexible
- Surface-friendly
- Small bending radius
- Easy to assemble
- Moisture proof

Applications:

- Heat tracing on apparatus, appliances and systems
- Devices and systems made of glass with sensitive surfaces
- Laboratory applications

Type ELW-GN up to 260 °C

Technical Information

Data

■ Insulation (1)	PTFE
■ Protective braid (2)	Nickel-plated copper
■ Outer jacket (3)	E-glass textile
■ Nominal voltage	230 V
■ Output	Approx. 50 W/m*
■ Operating temp., max.	260 °C
■ Dimensions (wxh)	Approx. 25 x 6 mm
■ Bendingradius,flat,min.	10 mm
■ Installation temp., min.	-60 °C
■ Moisture proof	Yes
■ Cold lead length, both ends	1.2 m, without plug
■ Protection class	I

Standards

■ Manufactured according to	DIN VDE 0253
■ Final inspection according to	DIN VDE 0721 T411 2.5 kV AC – 1 min

Type ELW-GN up to 260 °C

*Note: The output per meter of heating cable and the maximum possible operating temperatures depend on the respective application. For individual cases, we recommend that you contact our engineers – we will be pleased to advise you.

Other lengths upon request.
Resistance tolerance: +/- 5 %
All output figures are nominal values at +20 °C.
Lengths tolerance ± 2%, max. ± 0.25 m.

Cables shall neither intersect nor contact.
Provide protection by means of circuit breaker FI 30.
Please observe the standards IEC 62395-2, EN 60519-10.

Heating Tape for Corrosive Environments

The factory terminated heating tape ELW-VA is suitable for trace heating of apparatus, appliances and systems in a corrosive environment. The minimal dimensions of the heating tape enable close tracing. This heating tape is not sensitive to rough surfaces.

Advantages:

- Factory terminated
- Single end connection
- Highly flexible
- Small bending radius
- Small dimensions
- Robust
- Easy to assemble
- Moisture proof

Applications:

- Heat tracing on apparatus, appliances and systems
- Laboratory applications
- Temperature maintenance on piping

Type ELW-VA up to 260 °C

Technical Information

Data

Heating Cable for Maximum Flexibility

The factory terminated heating cable ELK-H is suitable for trace heating of apparatus, appliances and systems in a dry environment with protected installation. Both the high output and the slight, flexible design provide a wide variety of applications for this heating cable.

Advantages:

- Factory terminated
- Can be used for high temperatures
- Ready to be used instantly
- Highly flexible
- Small bending radius
- Easy to assemble

Applications:

- Heat tracing on apparatus, appliances and systems
- Glass devices and systems with high output needs
- Laboratory applications

Technical Information

Data	
■ Insulation	E-glass textile
■ Nominal voltage	230 V
■ Output	approx. 125 W/m*
■ Operating temp., max.	450 °C
■ Diameter	3.5 - 4.5 mm
■ Bending radius, flat, min.	8 mm
■ Installation temp., min.	Not restricted
■ Moisture proof	No
■ Cold lead length	1.2 m, without plug
■ Protection class	Depending on installation

Standards	
■ Manufactured according to	DIN VDE 0721 T2
■ Final inspection according to	DIN VDE 0721 T2 1.5 kV AC – 1 min

Type ELK-H up to 450 °C

*Note: The output per meter of heating cable and the maximum possible operating temperatures depend on the respective application. For individual cases, we recommend that you contact our engineers – we will be pleased to advise you.

Heating Cable

Robust, for Higher Temperatures

This factory terminated heating cable is ideally suited for trace heating of apparatus, appliances and systems in a dry environment. Preferably used for appliances and systems with high output requirements. Small dimensions and high flexibility simplify the assembly. The outer braiding provides protection against mechanical damages and can be integrated in the electrical protection measures.

Advantages:

- Factory terminated
- Increased safety through protective braid
- High output
- Ready to be used instantly
- Highly flexible
- Can be used for higher temperatures
- Small bending radius
- Easy to assemble

Applications:

- Heat tracing on apparatus, appliances and systems
- Devices and systems with high output needs
- Laboratory applications

Type ELK-HS up to 450 °C

Heating Tape for Maximum Flexibility

It is used to heat up glass, quartz or ceramic devices and systems in a non-corrosive and dry environment. The tape is highly flexible, does not damage the surfaces and is suitable for high output requirements. The heating tape should be protected mechanically and adjacent metallic parts should be integrated in the electrical protection measures.

Advantages:

- Factory terminated
- Ready to be used instantly
- Single end connection
- Can be used for high temperatures
- Highly flexible
- Surface-friendly
- Small bending radius
- Easy to assemble

Applications:

- Heat tracing on apparatus, appliances and systems made of glass, quartz or ceramic material
- Glass devices and systems with high output needs
- Laboratory & research applications

Type ELW-H up to 450 °C

Heating Cable for Highest Output

The preferred use of the heating cable is for glass, quartz or ceramic devices and systems with the highest output requirements in a dry environment. Small dimensions and high flexibility simplify assembly. The heating cable must be installed touch-protected. If you plan to use the heating cable on metal and at an operating temperature in excess of 650 °C, please consult our project engineers.

Advantages:

- Factory terminated
- Highest output
- Highest operating temperatures
- Ready to be used instantly
- Highly flexible
- Small bending radius
- Surface-friendly

Applications:

- Heat tracing on glass, quartz and ceramic devices
- Devices and systems with high output needs
- Laboratory & research applications

Type ELK-Q up to 900 °C

Technical Information

Data

■ Insulation	Quartz textile
■ Nominal voltage	230 V
■ Output	~ 175 W/m*
■ Operating temp., max.	900 °C
■ Diameter	Approx. 4 mm
■ Bending radius, min.	5 x outer diameter
■ Installation temp., min.	Not restricted
■ Moisture proof	No
■ Cold lead length	1.2 m, without plug

Junction Box

Round, for Wall-mounting

This innovative junction box provides a lot of advantages. Due to the shape of the box, for instance, it is not necessary to strongly bend the inserted cable thereby avoiding cable damage.

The unique snap fit permits rapid closing of the cover without needing a special tool. A safety lock, with appropriate tool included, prevents the cover from moving. Additional features permit the attachment of sign plates facilitating easy identification of heating circuits in complex systems.

Advantages:

- Rapid closing of the cover through snap fit, no tool required
- Increased mechanical safety through round shape
- Permits fixing of customer identification plates
- Up to 3 heating cables can be connected

Applications:

- Chemical & petrochemical industries
- Power stations
- Industrial plants with a need for frost protection or temperature maintenance

Type ELAK-R

Technical Information

Data

■ Ambient temperature	-45°C up to +50°C
■ Nominal current	See type plate, max. 28 A each terminal 6 mm ²
■ Nominal voltage	See type plate, max. 800 VAC
■ Terminals heating cable	Max. 6 mm ² / AWG 10
■ Terminal temperature sensor	Max 1.5 mm ² / AWG 16
■ Enclosure	Polyamide, RAL 7043 traffic grey
■ Dimensions (approx.):	Dia. 150 mm, height 125 mm
■ Cable glands	Polyamide
■ IP rating	IP65
■ Weight	Approx. 0.7 kg

Type ELAK-R

Type	Application	Features	Item n°
ELAK-R-1	Star point for 3 heating cables ELKM-AG (L and N)	wall-mounting, 3 x M16 (3-7)	0920051
ELAK-R-2	Connection of 1 heating cable ELK-AG (L and N) or star point for 3 heating cables ELKM-AG -...	wall-mounting, 1x M25 (9-17), 2 x M16 (3-7), 1 bore hole with thread plug M16 *	0920052
ELAK-R-3	Connection of 1 heating cable ELW-VA	wall-mounting, 1x M25 (9-17), 1 x M20 (6-12)	0920053

Note: Connection and termination kits are not included in the ELAK-R system. Please place a separate order for these items which depend on the type of heating cable used.

Junction Box, Round for Hazardous Areas

The innovative junction box ELAK-Ex-R is suitable for use in potentially explosive atmosphere in accordance with Ex-guidelines 94/9/CE (ATEX 95). Thanks to its exceptional shape it provides a number of advantages. Due to the form of the box, for instance, it is not necessary to strongly bend the inserted cable thereby avoiding cable damage.

A safety lock, with appropriate tool included, prevents the cover from moving. Additional features permitting the attachment of sign plates facilitate easy identification of heating circuits in complex systems. Suited for wall-mounting.

Advantages:

- No static charge
- Rapid closing of the cover through snap fit, no tool required
- Increased mechanical safety through round shape
- Permits fixing of customer identification plates
- Up to 3 heating cables can be connected

Applications:

- Hazardous areas
- Chemical & petrochemical industries
- Power stations
- Industrial plants with a need for frost protection or temperature maintenance

Type ELAK-Ex-R

Technical Information

Data

■ Classification	II 2G Ex e IIC T6 Gb II 2D Ex tb IIIC TX Db
■ Standards	IEC 60079-0 ed.6, IEC 60079-7 ed.4, IEC 60079-31 ed.1
■ Ambient temperature	-40 °C up to +50 °C
■ Nominal current	See type plate, max. 28 A each terminal
■ Nominal voltage	See type plate, max. 550 V
■ Terminals heating cable	Max. 6 mm ² (optional 10 mm ²)
■ Terminals temp. sensor (if required)	Max. 1.5 mm ²
■ Enclosure	Polyamide, no static charge
■ Dimensions (approx.)	Ø 150 mm, height 125 mm
■ Impact resistance	7 Joule
■ Cable glands	Polyamide
■ IP rating	IP65
■ Weight	Approx. 0.7 kg
■ Type of mounting	Wall-mounting

Type ELAK-Ex-R

Type	Application	Features	Art. No.
ELAK-Ex-R1	Star point for ELK-AG-...	3 x M16 (4-9 mm), 1 x threaded plug M20, 1 x threaded plug M25	0X80071
ELAK-Ex-R2	Two-phase heating circuit or as star-supply box for ELK-AG-...	2 x M16 (4-9 mm), 1 x M25 (8-17 mm), 1 x threaded plug M16, 1 x threaded plug M20	0X80072
ELAK-Ex-R4	Supply: 1 heating cable ELK-AG-... + EL-CT	2 x M16 (4-9 mm), 2 x M25 (8-17 mm)	0X80074

Note: Connection and termination kits are not included in the ELAK-Ex-R-system. Please place a separate order for these items which depend on the type of heating cable used.

Junction Box for Hazardous Areas

This junction box ELAK-Ex-3 in conventional design is suitable for use in potentially explosive atmosphere in accordance with Ex-guidelines 94/9/CE (ATEX 95). Moreover, the unit ELAK-Ex-3 covers a significantly wide range of ambient temperatures as shown on the data sheet. The junction box can be wall-mounted and is also available with stands for mounting on pipes.

Advantages:

- Covers a wide range of temperatures
- Suited for mounting on pipes

Applications:

- Hazardous areas
- Chemical & petrochemical industries
- Power stations
- Industrial plants with a need for frost protection or temperature maintenance

Type ELAK-Ex-3

Technical Information

Data

■ Classification	II 2G Ex e IIC T6...T4 Gb II 2D Ex tb IIIC T80 °C Db
■ Certificate	EPS13 ATEX 1506X, IECEX EPS 13.0002

■ Impact resistance	7 Joule
■ Cable glands	Polyamide
■ IP rating	IP65 / 66 depending on design
■ Weight	Approx. 1 kg
■ Type of mounting	Wall-mounting

Type ELAK-Ex-3

The ELAK-Ex-3 unit fitted with the mounting stand ELMW-9 (122 x 120 – Art. No. 0941009) is also suited for mounting on pipes. The mounting stand is 100 mm high.

Type	Application	Features	Art. No.
ELAK-Ex-3.1	Star point for ELK-AG-...	3 x M16 (3-6 mm), 35 A	0X80051
ELAK-Ex-3.2	Two-phase heating circuit or as star-supply box for ELK-AG-...	1 x M25 (7-17 mm), 2 x M16 (3-6 mm), 1 x threaded plug M12	0X80052
ELAK-Ex-3.4	Supply: 1 heating cable ELK-AG-...+ EL-CTB	2 x M25 (7-17 mm), 2 x M16 (3-6 mm)	0X80054

Note: Connection and termination kits are not included in the ELAK-Ex-3-system. Please place a separate order for these items which depend on the type of heating cable used. Appertaining screws are specified in chapter 'Accessories'.
